

THE GLEICHEN CALL

VOLUME XXVIII NO. 11

GLEICHEN, ALBERTA, WEDNESDAY MAY 30, 1934

SUBSCRIPTION \$2.00 PER YEAR

EMPIRE DAY SPORTS ATTENDED BY GOOD SIZED CROWD

The Empire Day sports held last week at the Gleichen fair grounds proved to be a very successful event with a large crowd on hand to witness the baseball tournament and the children's sports. It was a very warm day and yet an ideal one for baseball and those spectators who found it too hot were able to refresh themselves in the nearby lake.

All the events were keenly contested especially in the children's sports, each striving to out do the other. The Boy Scouts and the Girl Guides in their neat uniforms lent color to the scene. The children's sports were in charge of H. Hunter and Geo. H. Gooderham.

For the first ball game Meadowbrook was drawn against Gleichen and resulted in a win for the latter team. The second game between Carleton and Queenstown resulted in a win for Carleton. The last game played in the evening between Carleton and Gleichen resulted in a victory for Carleton. In the early stages of this game Gleichen was in the lead but Carleton got busy. So busy did they get that Gleichen used up three pitchers in an endeavor to stop Carleton from breaking all records for runs made on the Gleichen diamond. Finally somewhere about the eighth inning Gleichen threw up the ghost and conceded victory to the visitors.

In the evening a good crowd attended the dance given by the Community Hall.

The results of the children's sports are as follows:

Girls 7 years and under race: Peggy MacArthur, Doris Krause and Eugene McPhee.

Boys seven years and under: James Waterchief, Earl Mayfield and Teddy Yellowfoot.

Girls 9 years and under: Ester Downey, Betty McQueen, Gwen Clark, and Eugene McPhee.

Boys 9 years and under: Arthur Nicholas, Edgar Taylor and Teddy Varnell.

Girls 11 years and under: Alice Krause, Blanche Simenon and Bernice Krause.

Boys 11 years and under: Gordon Hall, Robert Sather and Philip Backfat.

Girl Guide relay race, half mile: Won by 1st Gleichen Girl Guide team.

Boy Scout relay race, half mile: Old Sun School Troop Team.

Girls race 13 years and under: Mary Downey, Della Hunter and Marie Landman.

Boys race 13 years and under: Martin Saddle, Gordon Christensen and Joe.

Girls race 15 years and under: Mary Downey, Beth Hall and Rita Ferguson.

Boys race 15 years and under: Arthur Forester, Isaac Ryer, Wesley Denjardine.

Boys 11 years and under three-legged race: Ted Stephen and Harry Bullman, Philip Backfat and George Studeagle, David Roynaldie and James Studeagle.

Girls 11 years and under three-legged race: Bernice Krause and Della Hunter, Annie Royal and Marie West, Alice Krause and Marie Landman.

Girls over 12 years three-legged race: Harry Wolf and Arthur Waterchief, Gordon Yellowfoot and Mark Wolf, Norman Schnepf and Willie Ferguson.

Girls over 12 years three-legged race: Ruby Hall and Mary Dumka, Beth Hall and Edith Beagle, Bernice Krause and Della Hunter.

Boys 100 yards open: Ed. Ferguson, Norman Schnepf, Gordon Yellowfoot, Girls 75 yards open: Ruby Hall, Mary Downey, Beth Hall.

Boys 11 years and under sack race: Robert Sather, John Backfat, Fred Stephen.

Girls 11 years and under sack race: Della Hunter, Bernice Krause, Ellen Jensen.

Boys 12 years and over sack race: Wesley Denjardine, Isaac Ryer, Joe Old Woman.

Girls 12 years and over sack race: Marie Dumka, Ruby Hall, Beth Hall.

Boys and girls wheelbarrow race: Wesley Denjardine and Kipp Schnid, Isaac Ryer and Ray Mausa Ruby Hall and Marie Dumka.

Boys and girls bicycle race: Wesley Denjardine, Alex. Murray, Howard Jensen.

LOCAL CHOIRS WIN FIRST AND THIRD AT SCHOOL FESTIVAL

Once again May 23rd was a red letter day for the majority of Gleichen children. Bright and early many hooves were afoot with excitement and mother was busy putting up lunch and seeing that each one was properly fitted out to make the eventful journey in search of laurels and success, the acquiring of information and the joyful adventure of new scenes and fresh experiences. At The Call watched all these merry youngsters leave we could not help wishing that the years had dealt less handsily with us and we could again make like a rejuvenated Columbus upon this modern voyage of discovery. The children showed the care and pride of their parents in the way they were fitted out to do their part in the day's proceedings and to enjoy to the full the happiness it brought in its train. The weather man added his quota to the general contribution and sent along a day not too hot and not rainy nor cloudy but which had a tinge of freshness to set everyone off in a holiday mood.

No less than seventeen cars loaded to the limit left town before eight o'clock in the morning, and after a safe and enjoyable run arrived in Strathmore in time to take part in the first contest of the day which began at nine o'clock.

The morning was given over to Dramatization, elocution and solo contests. In these events Theresa Flerty and Helen Kelly were successful in being awarded second and first respectively in their classes while Maureen Pineau and Doris Krause took second and third place respectively in their class for recitations. Miss Kent's "Christmas Eve" were awarded second place in the Junior town school dramatization, and Miss Van Volkenberg's class gained third place for their "Christmas Eve at the Riegles" in the senior competition.

In the afternoon the action swung to the elocution singing were the events scheduled. These showed a very pleasing variety of style and subject. A very noteworthy feature of these was the high quality of the singing of all the Gleichen entries. However, a great deal of stress was laid upon extemporizing and other incidents that are merely adjuncts to be sung and Gleichen drew a blank in this section of the festival. The day, however, amply made up for when the awards in the town school choruses were announced. After a close contest the first and third places were given to the Gleichen choir, trained by Mr. H. B. Jensen. The applause that greeted this announcement showed how the large audience agreed with the opinion of the adjudicators.

A number of children were able to get home before dark, but most of them stayed to the evening concert at which all the first place winners were contributing their number to a very fine program. The Hon. P. Baker Minister of Education, presided over a capacity audience and emphasized the benefits of such efforts to the children and the cultural life of the country.

The winners of the shield presented by Mr. J. C. Buckley for the rural school gaining the largest number of points went to Janet school, while the shield donated by the French Club Strathmore, was carried off by the Bow River school. This school was represented by a numerous and exceedingly well-trained series of contestants on all events, and the teachers are to be congratulated upon the success that attended their efforts. An especially noticeable feature of these entries being the elaborate costumes for the vocal events and the competencies of scenery and costumes that were part of the dramatic contributions.

The Call learns from conversations with the teachers that this year's festival, like that of 1932, will have been financed without any recourse to outside sources. The concert which was held a little over a week ago, and that while the proceeds from that will not be quite enough to pay all expenses there was a small surplus from the previous year.

To the reader who thinks in terms of prizes and awards The Call wishes

to point out that the benefit to our nation in this connection is not in the gaining of a prize only but in the training that is given from week to week; not in the applause of the crowded concert room, though that is an inspiring experience, but in the store of memories of the noble thought set to beautiful music; not in the concrete tokens of success as shields and certificates but in the more lasting treasure of memories that are a call when the hum-drum world is bearing heavily on one's spirit so that in the dark days the memory of beauty of sound, of rhythm, of noble thoughts will act as an inspiration and an incentive to greater effort and success in the after life of those who took part in these cultural sides of the work of education.

THE WEEK AT OTTAWA

(BY F. W. QERSHAW)

On Tuesday the Rotary Bill was discussed. The evidence against the bill far outweighed the evidence for it and the vote at the end of the day stood 165 against introducing state lotteries and 56 in favor of the same. All the party leaders were against the measure and chiefly because it had been given such a low trial in Great Britain and had finally been defeated. State lotteries were born in 1660 in England and expired by Act of Parliament in 1826. Mr. Bennett quoted from a book which claimed that during that 257 years the morals were corrupted and a spirit of speculation and gambling was encouraged. He saw in these taxes a pernicious influence and an animating tendency to cease work, the effect of this being ruinous to the individual. Japan with 60 millions of people prohibit lotteries of every kind. It was shown in the Irish Free State lotteries that the hospitals only received 18 per cent of the money raised. Private donations to Irish hospitals had fallen by 50 per cent during the last five years and it was pointed out that people got the impression that donations were not necessary because the hospitals got the proceeds of the lotteries.

All seemed agreed that the clause in criminal code at present which gives the prize not to the one who wins but to an informer should be changed.

The debate seemed to give some members the opportunity to recite poetry, this is one of the games.

"But music thou art not thy lane in proving foresight may be vain. The best laid schemes of mice and men gang aft agley."

An Irish's thought but grief and pain For promised joy."

This was written in 1732: "A lottery is a taxation Upon all souls in creation; And heaven be praised, It is easily raised, Credit's always in fashion For folly's a fund, Will never lose ground, While fools are so rife in the nation."

Under clause 12 of the Marketing Act the Cabinet is taking power to restrict or prevent any article from being exported or imported. If this becomes law they could restrict the amount of cane that comes into Canada and thus greatly enlarge the market for beet sugar.

SOME FOOD FACTS

(Experimental Farms Notes)

The requirements of an adequate diet may be briefly summarized as follows: It must provide enough energy for maintenance of body temperature and performance of physical work; it must supply sufficient protein of suitable nutritive quality; it must carry no excess of organic elements in correct proportions; it must furnish a sufficiency of vitamins; and finally it must include enough material of such character as to insure the proper handling of the food mass in the digestive tract.

A varied diet, which includes bread, meat, milk, butter, eggs, fruits and vegetables, raw as well as cooked, and some sea fish will supply all these essentials.

White bread for various reasons is likely to remain our staple food. It is the cheapest source of energy and is readily digested by adults and children. In quality wheat protein ranks high among the cereal proteins. Investigations over a number of years in the chemistry divi-

ATHLETIC CLUB WILL SPONSOR THE TAMPEDE SPORTS

On Monday the Gleichen Golf Club (inc. at vs. Vice-President competition). In all eight matches were played and the final result gave the Vice-President side five wins as against three wins for the President. The course is in good condition, the greens just lately having been sanded and oiled, and golf ball cleaners have been placed at the first and sixth tees.

The members of the Bassano Golf Club are expected to be guests of the local club on June 10th.

GOLF MEMBERS PLAY ANNUAL COMPETITION

At a meeting of the executive of the Athletic Club Monday evening it was decided to put on a combined stampede and sports on Wednesday June 27th. This will truly be a big day as some special events will be staged that will be sure to attract much interest. In another issue we will be able to give a more detailed account of the program.

ion of the Experimental Farms system have shown the high protein content and quality of Canadian wheat.

The more we eat the more vitamin B we need. The inclusion of 2 to 4 per cent of dried yeast in the white loaf will insure a sufficiency of this vitamin. Calcium is one of the most likely elements to be deficient in our food and the incorporation of milk powder in the loaf should be encouraged.

Iodine is liable to be deficient in the food of people who live far from the sea. The inclusion of sea fish, fresh or canned in the diet is therefore recommended. Fishmeals are now extensively used in poultry feeding and this suggests that eggs may be a valuable source of iodine.

The division of chemistry has investigated the iodine content of iodized salt and work is now in progress on determination of this important element in eggs.

THE STRAW HAT SEASON

The open season on men's straw hats is here. Although ambassadoring a straw hat is contrary to modern rules of procedure, the provisions of the open season lay on prohibitions upon the method by which a 1934 straw hat may be brought down, captured and subjected to cerebral servitude. Notwithstanding economic conditions, there are indications of a good season with hot weather already at hand. Native hats already are building their nests in the stores and the migratory leghorns and panamas have begun to appear throughout the countryside. These promises to be an unusually large number of species this year, and cleaning and banding are already going on in many a home and place of business. Hats that have been roosting in closets, attics and other winter resorts are being "shooed" out into the open and their plumage looked over with a view of making them serve a short term as a necessary balancer for the family budget.

Meanwhile the felts are looking forward to a closed season with good cheer. The winter has left its marks on them and the great majority will take a vacation without any protests. Some rugged individuals will ignore the call of the straw and they will be many. Weather conditions may act as a brief stay before many days elapse the wearer of last winter's felt will feel as conspicuous as a cherry in a tub of lemons.

An exchange publishes the following and it has its application: "A severe lesson in honesty among those who find lost articles and fail to return or advertise them is much needed. It is either not generally known or the knowledge is disregarded, that an effort must be made publicly to restore to the loser anything picked up by persons on the street or other places, and until this is done the finder runs under a suspicion of having stolen the article in question."

Refined Gasoline CRYSTAL CLEAR AND ODORLESS FOR 15c per gallon

Plus tax, F.o.b. our Gleichen Warehouse
Elimination of costly duplicate handling whereby we haul direct from the Calgary refinery, makes a big saving which is passed on to our customers in the above price per gallon.

We also have ROYALITE NAPHTHA from Turner Valley, which is the best produced from that district at 15c per gal. plus tax

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

May 28, 1914.

Empire Day was a red letter day in the history of Nanaka. Never before were there such crowds in that substantial little town. Gleichen folks were there in great force. Those who played on the Gleichen football team were Wyster, Latham, Moss, Wodell, Bell, Clement, Varnell, McConnell, Moss, Lee, Wagstaff. The game was played against Strathmore and was tied until the last couple of minutes when McConnell got a pass and booted the ball home.

The Gun Club held a tournament in the history of Nanaka. Never before were there such crowds in that substantial little town. Gleichen folks were there in great force. Those who played on the Gleichen football team were Wyster, Latham, Moss, Wodell, Bell, Clement, Varnell, McConnell, Moss, Lee, Wagstaff. The game was played against Strathmore and was tied until the last couple of minutes when McConnell got a pass and booted the ball home.

Local merchants are over stocked with butter and advise that they cannot buy more at present.

Douglas Hardwick left a week ago for England and will be absent for some time.

Geo. Gooderham returned last week from Toronto to again visit his brother, J. H. Gooderham for sometime.

The baseball match between Nanaka and Gleichen Wednesday evening resulted in a score of 9-8 in favor of Gleichen Friday night Gleichen played at Strathmore and won the score being 9-4.

The I. O. O. F. held elections Monday night which resulted as follows: M. Leese, N. G.; J. Barron, V. G.; H. Dunn, secretary and E. Holland treasurer.

J. T. Johnston returned Saturday from a tour through British Columbia.

Wife—I am going to give you a piece of my mind. Hubby—Just a small helping, please.

"The Silent Women of America" is the name of a new national organization. Strangely enough, it is not composed of dead-mutes.

A scientist thinks sleep is a form of intoxication. And we unto the married man who talks loosely while under the influence.

An inquiring reporter asks: "What kind of a husband does a wife miss most?" The little fellows are more difficult targets.

The Gleichen Flour Mill

Jack and Jill came to the mill
At first to do some spicing,
For Jack was shy and winked an eye,
When Jill got busy buying.

Jack knew well that Jill could tell
Exactly what was what,
So he stood near and said, "My dear,
I'll pay for what you bought."

Now Jack and Jill come to the mill
To spend a pleasant hour,
And don't believe they ever leave
Without some pancake flour.

About 150,000 persons in Great Britain are connected with the dog industry directly or indirectly.

Music Festivals And Spring

The music festival season, whether by accident or design, coincides with spring in this Western country; and it is peculiarly fitting that it should. The two seasons are highly compatible.

Spring is essentially the season of song—the joy of new birth, of life freed from the trammels of winter, of new hope and refreshment, of the seed-time and the filling and bursting of the buds, of the urge to new endeavor, of faith and a more expansive contentment. The pagans of old celebrated its advent with rites in which music was the vehicle of expression of that mirth and jollity the softer sun inspired.

The association of spring with song is universal—has been universal down the ages; for in the spring, nature awakes from long hibernical sleep to the notes of its own orchestra and the song of its own choristers. What more fitting than that the soul of man should "blossom in singing" when spring brings life anew to prairie and woodland!

The music festival idea has given point and purpose to man's urge to vocalize the finer aspects of his emotional existence and experience. The remarkable growth of that idea in prairie communities, indicated in the consistent expansion of the festivals, is one of the most reassuring evidences of the enduring quality of the social organization these communities reflect. The joy of singing and the love of music, emotions never realized nor appreciated to the full unless they are shared, are infallible kernels of closer ties of friendship and fellowship. The association thus cemented inures to a deeper sense of that brotherhood of man which makes the whole world kin.

Song is of the heart and of the spirit—a weaver of the very fabric of community life. Music symbolizes the harmony of which that life is compact and without which it cannot long survive. It is significant that visitors to rural communities of the prairie west have been struck with the fulness of the social life obtaining in them, despite the lack of those adjuncts which are considered indispensable to the amenities of city life. This feature has been remarked upon particularly in relation to the remoter communities where residents have learned to rely upon their own resources and their own proclivities for social organization, and where, in co-operative endeavor, they have managed to add spice and variety to their ordinary routine.

Music and song have thus become the greatest adjuncts of peace and contentment among the scattered communities of the far-flung prairies. They have contributed greatly towards the alleviation of the pangs of disappointment. They have made hardship less onerous, reaction less disruptive. These annual festivals, bringing, as they do, urban and rural dwellers of kindred tastes together, and demonstrating, as they do, a heritage common to the diverse people composing the population of the western provinces, are contributing much towards developing that fellowship which, wider than the communal, reaches through the provincial into the national life.

It is right that the winter should be a season of preparation and practice; but it is essential that the festivals should be of the spring. That's where they belong.

Stowaway Makes Good

Boy On Antarctic Ship Has Become Popular With Crew

Fourteen-year-old Einar Lamberg, who stowed away on the whaling factory ship Southern Princess, has made good. Einar discovered when the ship was on her way to the Antarctic. He had crept into the ship the night she left Sandefjord, Norway, and hidden under a barrel until hunger forced him to reveal himself. The skipper admired the lad's pluck, and made him a member of the crew. His quickness and keenness soon made the boy extremely popular with all the crew. In dark hours after a hurricane had smashed the rudder of the Southern Princess and it seemed certain that she would be lost with all hands, Einar proved his worth. His bright cheery manner and utter disregard for danger helped the morale of the older men.

First Bills Of Lading

Were Short Compared To Worthy Documents Of To-day

Bills of lading in the "good old days" of the sailing vessel were short and snappy as compared with the long details now printed in fine type on the back of such instruments.

A facsimile of a bill of lading issued in 1854 on "the good ship Meteor" from Boston to San Francisco released the ship and everybody connected with it from liability of all kinds in the brief liability clause which read in part, "the goods to be delivered in good order, the danger of seas and fire excepted." In other words, if it got there fine, and if not, it was too bad.

The canal is a native of the North American continent.

Shortness of Breath

Weak, Sinking Feelings

If going up stairs climbing hills, walking too far; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do to take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Tenants Steal Building

Remove It Piece By Piece To Split Landlord

Charged with stealing a building, several tenants of a row of flats have been arrested in Kluksdal, Poland. Back of this is a case of revenge against the renters' landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Stone by stone, door by door, window by window, they removed their flats several miles away and reconstructed them. Calling to collect his rents the landlord found an empty space where his flats had been. He aroused the village and a search was started. After many days the flats were found. Inside were the tenants, enjoying life without the shadows of a landlord's calls. The irate owner had them arrested, but is puzzling how he will get his building back where it belongs.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again

A woman sends the following account of the consequences of an auto accident in which she was involved: "A year ago I had a very bad automobile accident, which left me more or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 144 lbs. and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen Salts. I must say they have done me a lot of good in every way—but chiefly in keeping my weight down. In three months I lost 6 lbs. Then I left off taking the Kruschen, and I soon went up to 142 lbs. again. So at once I got more Kruschen, and am again steadily reducing. My weight last month was 134 lbs." (Mrs. W. H. M.)

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

"Made in China"

Oriental Make Up Irish Linen Handkerchiefs For American Trade

Handkerchiefs for sale in Atlantic City bearing the tickets, "Pure Irish Linen," and "Made in China," so aroused a visitor that he promptly wrote to the Belfast Times about it. In reply John Gilliland of Belfast, Director of the Irish Linen Guild declared that China is now buying thousands of pieces of linen to be made up into handkerchiefs and embroidered for the American trade. "Although Irish linen is used," he said, "owing to U.S. Customs laws, articles coming into that country can only be accepted if they are marked with the place of origin—that is China. It is really a case of China obeying the Customs laws. As a matter of fact Ulster manufacturers are keeping a good grip on the handkerchief trade in America."

SOURCED ON THE

WORLD?—THAT'S THE LIVER

Wake up your Liver Bile

No Calomel necessary. Many people who feel sour, sluggish and generally unwell make the mistake of taking calomel. Calomel is a powerful purgative, but it does not cleanse the liver. What you need is to wake up your liver bile. Bile is the oil of the body. It is the oil that keeps the daily two pounds of food in your bowels. (See your druggist and luncheon waiting at your service, come now.)

Cure's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. Use for health by nature. 25c. 50c. 25c. at all druggists.

Organ Built By Blacksmith

Donated His Work And Instrument Only Cost \$300

After four years' work Thomas J. Hoskins, blacksmith, motor engineer and organist, is completing a pipe organ in Pentre, Wales. The instrument, 12 feet high, nine feet wide, and seven feet deep, was made at the forge, and in the garage, the home and the church. Hoskins was organist at the Carter's Corner Methodist Church. The old organ wheezed out, and the congregation was too poor to buy a new one. Hoskins bought an old instrument, and from it took pipes and keyboard. Then he made 600 new pipes, from three inches to nine feet long. He bought 20 sheepskins for the bellows, and used 25 pounds of glue, more than 2,000 screws, 15 pounds of nails and much wood. The new instrument will cost \$300. Hoskins has donated all his efforts.

In their natural state the ruby and the sapphire are identical in composition, their difference in color being due solely to naturally included metallic oxides.

Sky Changes Coloring

At Different Altitudes

Moscow Experts Studying Records Taken In Stratosphere Flight

Remarkable evidence of changes of color in the sky at different altitudes in the stratosphere is one of the results which have been obtained by the experts in Moscow who are studying the records left by the crew of the Soviet stratosphere balloon Stratostat, which crashed after reaching the record height of over 13 miles.

Investigations are being carried on under the direction of M. Thomson, the senior scientific worker of the Central Weather Bureau. The gondola of the Stratostat carried numerous instruments for making automatic observations at various periods of the ascent and descent.

Among the data on which the experts have been working are twelve photographs taken at different altitudes, and twenty-seven spectrum observations.

The results of the preliminary investigations are stated to show that the sky gradually changes color as follows: 5.28 miles, marine blue; 6.83 miles, dark blue; 8.08 miles, dark violet; 11.81 miles, dark violet marine; 13.05 miles, dark violet grey; 13.67 miles, black grey.

This evidence bears out observations made by Professor Picard, the Belgian balloonist, and also by the crew of the Soviet Stratostat U.S.R., which made a previous high record attempt, who recorded that the sky at 11.81 miles high was "very dark violet."

The experts state that valuable records of sky colors were made by M. Vassenko up to the time when disaster overtook the balloon at a height, apparently, of 7.46 miles on the downward descent.

Wolves Kill Caribou

Trapper Brings Tale Of Wanton Destruction From North

Bringing stories of terrific onslaughts made by roving packs of wolves while the caribou were migrating, Edwin Sanguet, trapper of the sub-Arctic, reached The Pas, Manitoba, following nine months of travel west of Churchill.

Sanguet with his partners, John Ivanchuk and Charles Hendren, left last July with supplies for winter trapping 165 miles north of Brochet.

They travelled by canoe, and reached their headquarters on Oct. 11. During the trip they saw no caribou. But on the morning after their arrival, they went outside to find the migrating herds passing their door. Thousands of animals were moving south.

Following close on their heels were packs of from five to 35 wolves. Sanguet said the wolves in many cases killed purely for wantonness, and when there were not deer to knock down, they turned on each other.

Served Three Kings

Royal Servant Is Retiring After Forty-Two Years

Royal servant during the reigns of three British kings, William Dowsett, King's Page, has just retired after 42 years at Buckingham Palace, King George's London residence.

"Bill" Dowsett joined the royal service in 1892 as a footman. He gained promotion in successive stages and three years ago was appointed "Page-of-the-Back-Stairs," an honored position in the service which brings the occupant of it into immediate contact with the sovereign.

Have Never Seen Rain

Because of drought there are children ten years of age in South West Africa who have never seen rain. They have been distressed by the Minister of Lands who reports that rain has not fallen for seven years in some districts.

The tall-growing hybrid dolphins, so popular in Canadian gardens can be raised from seed easily, but as they do not come true, anyone wishing to increase the stock of a special plant must do so by division of the roots of that plant.

"If my three baby boys were restless with colic or nervous from their teeth I gave them a Baby's Own Tablet and they were soon asleep," says Mrs. T. Tweedy, 475 Mill St., Toronto. "The sweet little tablets remove the cause of fretfulness and the child becomes happy and well again. All the common ailments of little folk are cured by Dr. Williams' Baby's Own Tablets. Price 25c at your druggist's."

Dr. Williams' BABY'S OWN TABLETS

Figures Show Improvement

Average Value Of Canadian Farm Stock Has Increased

The average value of farm land in Canada in 1932, including both improved and unimproved land as well as dwelling houses, barns, stables and other farm buildings, is placed at \$24 per acre in an estimate recently issued by the Canadian government. This shows no change since 1932. Average farm land values range from \$63 per acre in British Columbia to \$19 per acre in Manitoba, Saskatchewan and Alberta.

Average values placed on farm livestock are: Horses, \$52; milk cows, \$31; other cattle, \$17; sheep, \$4; swine, \$8.89. The changes from 1932 values are slight except in the case of swine, which have almost doubled having increased from \$4.75 to \$9.39. In the same period the average value of wool increased from five to ten cents a pound. Total value of all farm livestock in 1933 amounted to \$403,375,000, an increase of about \$27,500,000 over 1932. The value of farm poultry is placed at \$33,450,000, a slight falling-off from the value in the previous year.

Average wages of farm hands during the summer season were \$17 per month for men and \$10 per month for women, board and lodgings, in both cases, being furnished by the employer. Counting in the value of board the average wages for men were \$32 per month and for women \$22 per month.

Of recent years, a number of promising smooth-skinned barleys have been produced by different plant-breeding institutions, including the Dominion Experimental Farms, but these varieties have not yet been tested for a sufficient length of time to say which is the most desirable. For the present, however, the variety called Velvet is favoured in Eastern Canada, while Regal appears most promising in the West.

Icelandic capital is named Reykjavik, meaning smoking harbor, after the hot springs, which are so prevalent in the country.

The dahlias should not be planted until all danger from frost is over,

May Have Dual Vision

Scientist Thinks Coon Adjusts Eyes For Day And Night

Raccoons that have reached the laboratories of the University of Colorado psychology department without meeting the usual fate of their kind on college campuses have convinced Dr. Lawrence W. Cole, head of the department, that they have a dual vision, one for daylight and the other for twilight. Dr. Cole announced that, after two years of intensive experimenting with the furry little animals, he had found that they could tell red from gray, but could not distinguish between two shades of gray.

In a speech in London recently the Prince of Wales urged every young man to become a linguist.

FALSE TEETH

Dr. WERNER'S POWDER

Would you like false teeth to fit so firmly yet comfortably they feel natural—eat, shout, laugh—all day long you can forget about them. Simply sprinkle on Dr. Werner's Powder—prescribed by the world's foremost dentists—the one powder that assures 100% secure comfort. SPECIAL FEATURING: comfort-cushion protects sensitive gums—always keeps mouth clean and sanitary. Inexpensive—any druggist.

35 feet of white or coloured paper for kitchen use—covering shelves, lining drawers, etc.

Dramatic Art In Canada

Great Interest Taken In Second Dominion Drama Festival

The rapid development of native dramatic art is indicated by the interest which has been aroused and the artistic ability which has been displayed in the second Dominion Drama Festival, just held at Ottawa.

The Dominion Drama Festival was inaugurated by His Excellency the Earl of Bessborough, Governor-General of Canada, in October, 1932. The purpose was to encourage the development of dramatic art in Canada by means of regional and Dominion competitions among amateur dramatic organizations. Regional competitions are held during the winter at convenient centres throughout the Dominion, and the winners of these competitions meet at Ottawa in the spring to "play down" for the Dominion championship and the Bessborough trophy.

This year 22 amateur groups participated in the final competition. Five groups were from Ontario, two from Montreal, two from Saint John, N.B., two from Ottawa, and one each from Quebec City, Galt, Kingston, London, Regina, Sarnia, Selkirk, Winnipeg, Verdun, Edmonton, and Vancouver. Their work was appreciated and the awards made by James T. Grein, a distinguished dramatic critic who came from England especially for the purpose.

The highest award, which carries with it the Bessborough trophy, went to the Hart House group, from Toronto, for their presentation of "Michael," a mystical and beautiful Russian play. The award for the next best production in English went to the Ottawa Drama League for its presentation of "Marco's Millions."

The award for the best production in French went to La Cercle Molliere, of Winnipeg, for "Blanchette." The Governor-General and Lady Bessborough's mementos for best individual workmanship were awarded to Miss Joan Miller, of Vancouver, and J. E. Adams, of Sarnia, Ontario.

During the whole competition over 1,700 persons actually took part, and the plays were witnessed by over 50,000 people.

Victor Was Real Cyclist

South African Boy Did Additional 210 Miles After Winning Race

After winning a 100-mile cycling championship in Port Elizabeth, South Africa, M. Rustenburg, a young post office messenger, pedaled 210 miles back to his home in East London in record time. In spite of a 45-mile gale, Rustenburg made the 100 miles in five hours, 50 minutes, 50 seconds. The automobile which was to take him back to East London in time for work two days later failed to appear. The lad started to cycle the 210 miles at four o'clock the morning although a gale was blowing and he had neither lamp nor repair outfit. At 11 o'clock that night he arrived home, tired, but happy, in time for a good night's rest before going to work.

One of the private gifts to Great Britain's new cruiser Neptune, is a painting of the Neptunes that fought at Trafalgar.

The semolina of the Kibanka Ottawa 37 variety of wheat is valued highly for the manufacture of macaroni.

For EASIER Dyeing . . .

The new Instant Rit is easier to use than any other tint or dye you ever used. It dissolves completely in 40 seconds . . .

... makes a brilliant, even-toned finish . . . and lasts and lasts and lasts!

YOU'VE HAD "BETTER LUCK" WITH

NEW! No longer a soap! Dissolves instantly.

May Not Be Scientific

But Old-Fashioned Way of Raising Baby Was More Humane

Dr. Knight Dunlap, professor of psychology at the Johns Hopkins University, has pronounced the modern methods of rearing babies as "systematized neglect."

Further, the doctor adds, "a baby is not a vegetable. Neither is it an animal. It should not be left alone to develop by itself or to devise ways of amusing itself. A baby needs social life just as much as do adults. Babies should be talked to, tossed in the air and petted and cuddled as much as possible."

Hear! Hear! We like that professor. We think he has some sense.

Of course there are two sides to the question. For instance, if mothers went back to the old-fashioned way of raising babies, what effect would it have on the economic life of the community?

Would the gain to the baby, in particular, and the world in general, compensate for the disastrous effect the foot that rookied the cradle, ruling the world.

Perhaps not. But it might be worth a trial. There was a good deal of truth in that old saying about the foot that rookied the cradle, ruling the world.

Rocking or tossing a baby may not be scientific, but there is a good deal more humane nature in it than turning the key on the baby and letting it shift for itself.

A good many lessons of wisdom, of self-control and of moral right and wrong were absorbed through companionship in those old days and faults were often corrected before they became habits.

But cradles and cradle days became old-fashioned when outside influences became so many and so varied and the incubator breed of babies came into style.

Since that date the baby has lost much of the joy of living, which future years will never bring back to it and the system has worked that way with the parents, too.

Where Rain Is Plentiful

Henderson Lake, B.C., Had 253-Inch Fall Last Year

While Jupiter Pluvius is by no means canny in the distribution of his wares in any part of British Columbia in the coast area, it may not be generally known that Henderson Lake on the west side of Vancouver Island was perhaps the wettest spot in North America during 1933, with a total rainfall of 253 inches, and a good measure an additional 45 inches of snow. Rostland, with 4.08 inches of rain, qualified as the driest spot in British Columbia during the same period.

Yet a resident of Henderson Lake might tell an inquirer with a measure of truth that 1933 was a comparatively dry year for it. In 1932 the precipitation made an undisputed record with 319 inches of rain.

But while Henderson Lake had no really close competitors for its distinction, Ocean Falls coming next with 198 inches of rain, Rostland, with 4.08 inches of rain, was maintaining its enviable record for dryness. Oliver came a close second, with 4.9 inches and Telukwa was not very far behind with 4.96 inches.

Planes To Visit Toronto

British Air Force Sending Four To Centenary In July

A fleet of four planes of the British Air Force will take part in the Toronto centenary celebrations in July. It was announced in the House of Commons by Sir Philip Sassoon, Under-Secretary for Air. The machines will be the Hawker Fury, the standard interceptor fighter of the Royal Air Force. They have a top speed at 15,000 feet of 214 miles per hour, and are extremely fast climbers. They are all-metal biplanes with a Rolls-Royce Kestrel engine.

No Question About It

Mike had just arrived in America and he and Pat were walking down a street when Mike saw a barrel of cranberries in front of a fruit store. Mike said to Pat: "Shure, and what do you call them things?"

"Shure, them's cranberries," says Pat.

"And are they good to ate?" says Mike.

"Shure they're good to ate," says Pat. "Just stow them with a little sugar and they make for better apple sauce than prunes do."

The cold pole of the earth is believed to be at the Siberian town of Verkhoyansk, where the temperature goes down to 160 degrees below zero, Fahrenheit.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:

Nervousness
Frequent Headaches
Neurosis
Feeling of Weakness
Indigestion
Stomach Aches
Loss of Appetite
Mouth Bitterness
Nausea
Sour Stomach
Auto-Intoxication

WHAT TO DO FOR IT:

Take 3 teaspoonfuls of **Phillips' Milk of Magnesia** 3 or 4 times a day, after every meal when you get up. Take another teaspoonful to relieve any acid stomach, and another before you go to bed.

It is the new **Phillips' Milk of Magnesia** tablet—one tablet for each teaspoonful as directed above.

ALSO IN TABLET FORM: Each tiny tablet is the equivalent of a teaspoonful of **Phillips' Milk of Magnesia**.

Phillips' Milk of Magnesia

MADE IN CANADA

Never Sees A Summer

Captain Of Icebreaker Spends Life Among Winter Conditions

A year is twelve months' winter—that's the definition Capt. W. J. Bascom of the Icebreaker McLean would give to the conventional 365 day period.

For a year is a period of ice and snow to the doughty captain, whose whole life is given to keeping ice out of places it shouldn't be, but where nature annually insists on putting it. A hot summer would be just as big a curiosity now to Captain Bascom as an orange grove to a Montrealer.

"It's always winter with me," he said grimly, then added: "I've got to eat."

However, the chances are that the Blue Nose captain doesn't feel badly about it, and probably has a sort of fondness for the ice. He says he is always lives. Certainly it has given him a wonderful complexion, and Captain Bascom looks as though he has a constitution as tough as the ship he commands.

As soon as the captain has smothered the ice to the Victoria pier, he hits for the cold country again. Montreal is the most roughest point he reaches during the year. Already he has turned round to go to the Gulf, there to smash ice and escort ships.

Then he has to go on to the Straits of Belle Isle, and take a whack at the baby bers there. Then, when warm weather finally does get to Belle Isle, it's the polar seas for him. He has to take a tug up to Hudson's straits, and that is where Captain Bascom summers. He cruises up and down the polar bear belt.

When he gets the last ship out of the bay, he comes down to the Gulf of St. Lawrence. By that time the wind is whistling through the dead grass in the gray fields. Having seen the last hardy tramp out to the open seas, Captain Bascom and company take up their position at Quebec.

Here all winter, they go on jams up near the Quebec bridge, they patrol the river, and keep things open for the ferry boats.

Finally, along about March 1, it's time to open the port of Montreal again, and after a month's voyage through ice varying in thickness from one to four feet, and every inch of which he had to smash, he arrives there. Once more he is at the tropical end of his cruise, and back to the Arctic Circle he starts.

It has been found that aluminum becomes stronger in the bitter colds of high latitudes.

Love is blind, marriage is a skillful oculist, says the Brandon Sun.

Spain has excellent scenery for exterior cinema films.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods of life you need a tonic which can depend on. That's why so many take **Lydia E. Pinkham's Vegetable Compound**. 98 out of 100 say, "It helps me!" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Little Helps For This Week

"Obey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you, that it may be well unto you." Jeremiah 7:23.

And oft, when in my heart was heard
Thy timely mandate, I deferred
The task, in smoother walks to stray;
But Thee I now would serve
More strictly, if I may.

—W. Wordsworth.

Pray Him to give you what the scripture calls "an honest and good heart," or "a perfect heart," and without waiting begin at once to obey Him with the best heart you have. Any obedience is better than none. You have to seek His face. Obedience is the only way of seeing Him. All your duties are obediences. To do what He bids is to obey Him, and to obey Him is to approach Him. Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but appears near to the visible screen of things which hides Him from us—J. H. Newman.

As soon as we lay ourselves at God's feet we have enough light given us to guide our own steps; as the foot-soldier who hears nothing of the council, that determine the course of the great battle he is in, but hears plainly enough the word of command which he must himself obey.—George Eliot.

Canard Sailings

Initial Trans-Atlantic Trips Marked By Heavy Passenger Lists

The St. Lawrence season of the Canard and Anchor-Donaldson Lines opened recently with the arrivals and departures of the Ausonia and the Athenia. The Ausonia made her first appearance early in May and from now on, these companies will maintain practically a weekly service to Plymouth, Havre and London and to Belfast, Glasgow, and Liverpool, throughout the summer and autumn months, the close of the St. Lawrence.

Lines on this route have been mentioned, include, The Letitia, Alania, Ascania and Aursania.

The initial departures have been marked by heavy passenger lists in all classes and this, with the advance reservations already made up, summer sailings, would indicate that this will be a good year for trans-Atlantic business.

Slight increases in exchange rates in certain European countries have been more than offset by falling prices abroad, the many lands hotels and railways have reduced their tariffs by as much as half.

Indications are that this will also be a good cruise year. Last winter the veteran Mauretania in her all-white dress and with her gayly decorated funnels, already made up popularity in her West Indies cruises from New York. After being newly furnished, she will make similar short "sea-breeze" cruises to the West Indies from New York, commencing July 2.

On June 28th the Carinthia will make a cruise from New York to the North Cape and Russia. Short cruises to the Saguenay, Quebec, Munay Bay and Bermuda will also be made on the California, Transylvania, Princeton, and company cruises including a call at the Bay of Islands in Newfoundland.

One of the most popular cruises will probably be that made by the Franconia on September 18th from New York to South America. Under the joint management of The Cook & Son, American Express Co., and the Canard Line, this cruise will carry hundreds of Canadian and American pilgrims to attend the Eucharistic Congress being held this year in Buenos Aires. Calls will be made in Havana, Trinidad, Rio de Janeiro, on route to and from the Argentine Capital.

The popularity of the short cruise in Britain has been phenomenal. This year will see an extensive programme of such sea excursions from Liverpool, Glasgow, and Southampton to the Atlantic Isles, and the Mediterranean and around the British coasts.

Looks Like Prosperity

If innumerable 10 and 20-dollar bills are a sign of prosperity, then it has arrived in Nova Scotia at last. Sydney merchants, restaurant proprietors and insurance companies have been kept on a constant trek to the banks to change the yellow-backs proffered by their customers for bills of smaller denomination.

Great Salt Lake in Utah is more than four-times as large as the Dead Sea.

There are at least 80 stars to every man, woman and child on earth.

Quick Relief Now From Neuralgia

JACK, I'M TO GET CLARK ABOUT MY BACK IN 40 MINUTES. I HAVE TERRIFIC NEURALGIA. WHAT CAN I DO?

DON'T WORRY! GET SOME ASPIRIN. TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

WELL, JACK, I GOT THE ORDER! YES, FELT IT AS A FIDDLE... YOU BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, . . . the fastest soft relief, it is said, yet discovered.

These pains are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly as you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. Be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Squaring The Circle

Lawyer Claims He Has Solved Most Baffling Problem

The most baffling mathematical problem in history, which has even Pythagoras—how to square the circle—is said to have been solved at last. Milan Popovitch, a middle-aged lawyer from Nish, claims that he has done it. He started struggling with it as a schoolboy. He continued his efforts when a prisoner of war. He has been at it ever since—in the spare time he could wrest from his professional duties.

Reports that an American mathematician had left a considerable sum of money to anyone who could solve the problem, spurred Mr. Popovitch in his efforts to work out this outstanding proposition. Now, at last, he declares that he has found the solution, but before he makes his fortune he must demand that a commission, appointed by the executors of the American's will, shall examine him and be convinced that the circle has really been squared.

THE RHYMING OPTIMIST

By Aline Michaeli

LIKE LAND-LOCKED SHIPS

When at the wharf I stand and watch the ships

Take on the cargoes waiting at the

See yawning hold and giant crane

That grips its load, I moment, then swings

Its load back for more,

I sense an eagerness to be away.

Its echo rings through every foreign

Both ships and sailors ache for wind

And open ports to greet them, thrusting

out.

A kindred haste throbs sometimes in

my breast.

The years' strain shores press close

upon my heart.

Too long at anchor chained, too long

at rest,

With all my cargo now I would de-

part.

Like land-locked ships, I would sail

back to sea,

Return full-reinforced to eternity!

A new bait for grasshoppers is

being tried out by the U.S. Depart-

ment of Agriculture, oil being substi-

tuted for molasses in mixing the

bait and arsenic. Oil baits, it is

stated, do not deteriorate during

storage as rapidly as molasses. In

Canada, water-mixed bait has been

found to have a distinct attractive-

ness to the insects, because grass-

hoppers like to drink when they eat.

Game Increase In Rockies

Noted Guide Reports Larger Herds Of Goats And Deer

Big game animals are increasing in number in the hunting areas outside of the boundaries of Jasper National Park, according to reports from park wardens and from hunters, received by C. K. Howard, head of the tourist department of the Canadian National Railway. Montreal, which handles hunting and fishing activities in the Dominion.

Jack Brewster, noted big game guide and outfitter of Jasper, reports that in two trips with hunting parties last fall he encountered 1,154 big game animals, including bunch of 104 Rocky Mountain goats and 87 bighorn rams in addition to caribou, moose, deer and other game. Both parties of hunters secured full bags of trophies without difficulty.

Here and There

Another sale of salmon angling leases is announced in New Brunswick for the famous waters of the Upland River which will be leased to the highest bidder at a sale to be held in Fredericton, April 27. The leases will be for ten years from March 1, 1933.

Canadian railway salaries have experienced severe cuts over the past few years. This has applied to officers as well as to workers on the trains and along the lines. The recently issued annual report of the C. P. R. announced that E. W. Beatty, Chairman and President of the C. P. R., had instituted a special cut of 15 per cent for himself and the Company's directors. This makes a total cut of 25% for them since the decline in earnings began.

Nipigon River's famous speckled trout don't know it yet but the ukase has gone forth that non-residents shall pay only \$5.00 for an annual fishing license, or about half the charge hitherto. Further, Nipigon guides will offer their services this year for \$25.00 a week as against \$28.00 in 1932. These trout in the Nipigon pools and in those off the islands at its mouth including St. Ignace, run to seven pounds and up.

Canadian Pacific liner Empress of Japan recently hung up a new speed record when she travelled the 2,329 miles from Honolulu to Victoria in four days, eight hours and three minutes, clipping seven hours, 47 minutes from her best previous time for the voyage and much outdistancing the best mark for any other Pacific liner except the Empress of Canada.

The literary hit of the year has been made by Frederic Niven, Canadian author, living near Nelson, B.C., whose "Mrs. Barry" has been recently hailed by authorities as one of the most profoundly moving books ever written. Mr. Niven, who thus breaks into the ranks of best sellers, earlier in the century handled baggage and freight for the Canadian Pacific Railway at Nelson.

H. F. Mathews, general manager, Canadian Pacific hotels in western Canada, with headquarters at Winnipeg, has been promoted general manager of the company's hotel system from coast to coast, with headquarters in Montreal, according to a recent announcement by E. W. Beatty, chairman and president of the railway.

An improved solvent has been developed for removing chewing gum from under theatre seats and elsewhere.

Town & District

The officers of Alberta Star Chapter, No. 18, Gleichen were entertained by their Worthy Matron, Mrs. Margaret McArthur to a two o'clock luncheon, Saturday afternoon, May 26th, at her farm home nine miles north east of town. A very enjoyable afternoon was spent by all.

J. Bulmer of Bassano has moved to Bowden, Alta., a town near Oida. This means that he will not play hockey with the Gunners next winter. With Johnston and Bulmer gone the Gunners will be considerably weakened for next winter. The local fans are asking each other what is being done to strengthen the team for next season, especially when every hockey town in this part of the world is making strenuous efforts to build up their squads in every way possible.

A. Hill, a wholesale traveller was in Gleichen Monday, having just returned from a trip to Saskatchewan and states that the people here are living in a garden of roses, in comparison with conditions in Saskatchewan. He describes conditions there as terrible and had never seen such sights in his life, horses and cattle lying dead in the fields everywhere, starved to death.

Next issue we hope to explain what steps are being taken towards getting the roof on the rink.

A prominent citizen received a sudden invitation to spend a holiday with a party of friends up north. He was anxious to go, but didn't know whether it was a fishing or shooting party, so he wrote: "I will start at once. What shall I bring?" In a few hours he received this reply: "Corkscrews. We have the rest."

During the past couple of weeks several carloads of horses have been shipped from Gleichen to Manitoba.

Douglas Hardwick of Armada spent a couple of days in town last week on business.

Sunday the Indians of South Camp started training for the Calgary Stampede. They spent several hours riding outlaws. Some of the braves made splendid rides and if they keep on practising every Sunday they should be able to win some of the prize money at Calgary in July.

Geo. W. Savage an inmate of the Everetts Home died last week, the funeral taking place Wednesday to Everetts cemetery, with Adj. Sutherland conducting the service. The late Mr. Savage had been here for the past six years, and came from Carbon.

Mr. and Mrs. Ridley and Mrs. Myers of Taber spent a few days visiting Mr. Myers of the local High School staff.

There will be no matinee next Saturday afternoon, but in the evening two performances will be, given one starting at 7.30 and the other a 9p.m.

Russell McQueen, one of Gleichen's most enterprising business men, is always on the alert. He has found a way to sell gasoline real cheap. Just take a look at his ad.

A number of the sidewalks in town have been undergoing extensive replacements lately which makes a decided improvement in the appearance of the streets.

There is an excellent tonic which many citizens are making use of in pretty liberal doses these days, morning and evening. It is not cream of tartar nor sulphur and molasses. The main ingredients are a spade, a hoe, a rake, a hose, and such other necessities as may be necessary to indulge in the hobby of a yeard or garden.

Do your own advertising. Make it a study. Study the wants of your trade. When you get something they want let them know it. Do what you say you will, and a fortune is yours. Advertising is a study, and if a man waits until he has purchased a stock of goods and gets it placed on the shelves, and then thinks about talking to the people, a school boy could predict his cavernous failure. You can not succeed on your reputation as a good writer. You can not succeed on your reputation as a good book-keeper. You must have other essentials, and the chief of these is to be able to get near the buyer and to inspire that confidence which will induce long-continued mutual good feeling, and to this end the newspaper is yours.

A new electrical operated machine can turn out 5,000 doughnuts an hour.
